propagation variable, very hot at qth

From log of: VK2AZ Hilary Bridel

=====

Not much contest activity. Only 10 unique stations worked in 24h, but many more listening/watching according to VKSpotter.com.

Real shame that these stations are not supporting contests which ultimately helps us all.

Thank you to everyone that I worked.

Operated from Mt Banks (SOTA VK2/CT-032) 1060m ASL in the Blue Mountains National Park (VKFF-0041) for the 2020 Spring VHF-UHF Field Day.

Antenna was a 3-element tape measure beam for 2m. An Elecraft KX3 was used with a 40W amp. Weather was hot and very windy throughout the day.

Propagation was ordinary until the late afternoon when ZL stations began to be heard and eventually worked.

Another great weekend. Huge effort by the team to get station on air and operational, made worthwhile with a tropo opening  
to ZL1 on 2m, 70 and 23cm.

Interesting contacts. Great results from small Moxon home brew antennas on 2m and 70cm

From log of: VK5NE Paul Roehrs  
=====  
Not much in the field in SA due to the weather. Finally a bit of 6 metre action in the last 2 hours.  
  
VK4EM was worked on FT8 and only 4 character locators exchanged his locator QG52 his signal +02 My signal +06  
Also worked VK4WTN and VK4HJ just prior to VK4EM but not claimed as locators not obtained.

From log of: VK5OQ Keith Gooley  
=====  
The QSO with VK4IF may not be valid as I couldn't confirm that he copied my grid locator. As it represents 20% of my points  
I'll leave it in and leave it to the adjudicator to decide if it's valid or not.
