of Australia*

**National Technical Advisory  
Committee**

# **AUSTRALIAN VHF - UHF RECORDS SINCE 1947**

The following is a list of all Australian VHF-UHF records, extracted from WIA files, back issues of "Amateur Radio", and other sources.

The record categories are:

**Home station / portable:** both national and separate state / territory records.

**ATV, Digital Modes, EME, Digital EME, and Mobile:** national records only.

If a call area, or a record category, is not listed for a particular band, it is because no claims have been made as yet.

Records are listed in order of distance and in the order in which the claims were processed. This explains why some records were superseded by contacts made on an earlier date. All distances originally recorded in miles have been converted to kilometres. The format of dates is DD/MM/YY.

Any additions or corrections to early records would be most welcome, especially if you are aware of any record claim that is not included in this list.

If you wish to claim a new record, please obtain a copy of the terms and conditions, and a claim form, which are available on request from the TAC chairman or can be downloaded in PDF format from the WIA web site. Claims are accepted only on the condition that the applicant agrees to accept the WIA's ruling as final.

Please send any information, enquiries or claims for new records, to:

The Chairman, WIA Technical Advisory Committee,  
PO Box 2042, Bayswater, Vic 3153.  
E-mail: [tac@wia.org.au](mailto:tac@wia.org.au).

From To Date Distance (km)

## 50 - 54 MHz Band Short Path

(Between 01/04/1964 and 01/08/1983, amateur operation was confined to 52 - 54 MHz.)

## Unassigned Frequencies Above 250 GHz

In Australia, no frequencies above 250 GHz are assigned by ACMA. For this reason it is legal for anyone to transmit on these frequencies.
